

Squash features comparison

		COMMUNITY		PREMIUM		
SQUASH TM						
 <p>Squash TM</p>	Test asset management	Manage requirements, test cases and datasets repositories	○	●	+ High level requirement	
		Build a test asset related to agile objects from Jira	○	●		
		View tests and run results in Jira	○ Jira Server	●	+ Jira Cloud and Jira Data Center	
	Test campaign management	Manage test planning and execution	○	●		
		Design optimized execution plans via wizards		●		
		Report bugs pre-filled with test steps to bugtrackers	○ Mantis, Bugzilla, GitLab	●	+ Jira, Redmine, RTC, Tuleap, Azure DevOps	
	Management of the global quality	Manage the progress of test projects via visual indicators and customized dashboards	○	●		
		Generate test reports pre-filled by Squash from a perimeter of execution		●		
	Integration	Manage authentication and delegation (LDAP, Active Directory, SAML 2.0)		●		
		Industrialize functional administration with a REST API		●		
SQUASH AUTOM						
 <p>Squash AUTOM</p>	Design with Squash TM	Write the tests in BDD format	○	●	+ autocompletion	
		Build and manage an action words library for the BDD		●		
		Structure the automation process using tasks and an automation workflow directly in Jira		●		
	Implementation	Associating test scripts and manual test cases and integrate them into the test repository execution plan	○	●		
		Triggering, chaining and managing automated multi-technology tests	○ Cucumber, Cypress, Robot Framework, Junit, SoapUI, Postman, SKF	●	+ UFT, Ranorex, Agilitest, Katalon	
	Automated test execution	Transmission of Squash TM parameters to automated tests	○ Test cases	●	+ Campaign, Iteration, Suite	
		Exploitation of the history of automated executions directly in Squash TM execution plans	○ Automated suites	●	+ Automated tests	
		Visualization, from Squash TM, of a user-friendly report (Allure format) on automated test results	○	●		
	SQUASH DEVOPS					
	 <p>Squash DEVOPS</p>	Integration with Squash TM	Triggering automated tests of a Squash TM execution plan from your CI/CD	○	●	
Transmission of Squash TM parameters to automated tests launched from the CI/CDSimplified			○ Test case	●	+ Campaign, Iteration, Suite	
Visualization, from Squash TM, of a user-friendly report (Allure format) on the results of the automated tests launched by the CI/CD			○	●		
Integration with the CI/CD pipeline		Simplified integration with Jenkins	○	●		
		Use of the Squash orchestrator as a Quality Gate in a CI/CD pipeline: the failure of any test in the automated test suite stops the pipeline	○ Possibility of refining the pass/fail criteria starting in S2 2022	●	Possibility of refining the pass/fail criteria starting in S2 2022	

SAAS SUBSCRIPTION
 Henix offers SaaS subscription packages starting from 5 users.

SERVICES		
Versions	Server	Server or SaaS
Support and assistance	Forum	Professional support
Exchanges with the community and the editor	Forum	Access to the Squash User Club

PRICE TABLE FOR OUR PREMIUM OFFER

SERVER OFFER		Annual rates € excl. tax				
Squash TM	Number of users reported in Squash TM	50 users	100 users	250 users	500 users	500+ users
	ANNUAL PRIME RATE		6,000€	10,000€	20,000€	35,000€
Squash AUTOM	ANNUAL RATE	75% of the annual base rate (*)				
Squash DEVOPS	ANNUAL RATE	75% of the annual base rate (*)				

(*) for use of Squash AUTOM and/or Squash DEVOPS with a test repository other than Squash TM, basic price indexed on the number of users of this repository

SERVICE OFFER		Annual rates € excl. tax							
Squash TM	Number of users reported in Squash TM	5 users	10 users	25 users	50 users	100 users	250 users	500 users	500+ users
	SAAS		1,080€	2,160€	4,320€	8,640€	15,000€	30,000€	45,000€
OUTSOURCED SC TEST TOOLING in addition to the SERVER or SaaS offer (modular with white label service catalog for your projects)			from (**) 10,000€		from (**) 15,000€	from (**) 20,000€	from (**) 30,000€		On quotation
Squash AUTOM Squash DEVOPS	TEST FACTORY MCO (on customer site)				On quotation				

(**) according to chosen services, on quotation

Calculation example for a Serveroffer for 100 users with Squash TM, Squash AUTOM and Squash DEVOPS modules: 10,000€ + 0,75 x 10,000€ + 0,75 x 10,000€ = 25,000 € excl. tax/year
